CERTIFICATE

This is to certify that the project entitled “**Bus Ticket Booking System**” has been carried out by “**Tirth Prajapati (2104030100785)**”, “**Lakshya Parihar (2104030100551)**”, **Uday Sathvara (2104030100885)**” under my guidance in fulfillment of the Minor Project (1040233395) Subject of **Bachelor of Computer Applications** – 5th Semester of Silver Oak University, Ahmedabad during the academic year 2023- 2024.

Prof. Vandana Mam

Internal Guide

Prof. Amit Patel

Head of The Department

ACKNOWLEDGEMENT

We are heartily thankful to Our supervisor, **Prof. Vandana Mam** , whose encouragement, supervision and support from the preliminary to the concluding level enabled us to develop an understanding of the subject. At the end, we offer our regards and blessings to all of those who supported us in any respect during the completion of the project and to our college for providing a resources and materials.

We would like to extend our gratitude to **Prof. Amit Patel** head of Bachelor of Computer Applications, Silver Oak college of Computer Application, Ahmedabad, for his continuous encouragement and motivation.

Last but not the least we would like to mention here that we are greatly indebted to each and everybody who has been associated with our project at any stage but whose name does not find a place in this acknowledgement.

Yours Sincerely,

Tirth Prajapati (2104030100785)
Lakshya Parihar (2104030100551)
Uday Sathvara (2104030100885)

ABSTRACT

This is a project report on “Bus Ticket Booking System”. During the making/developing of this project we explored new ideas and functionality behind the working of a notepad. This project is the output of our planning, schedule, programming skill and the hard work, and this report reflects our steps taken at various levels of programming skill, planning and schedule. We have learnt a lot during this project and liked the improvement in our testing skills and deep concept related to these kinds of projects. Our project is Bus Ticket Booking System. This is a web based application which helps people to conveniently plan their travels, choose specific routes, select preferred seats, and make secure online payments.

INTRODUCTION

A bus ticket booking system is a digital platform designed to streamline the process of reserving seats or tickets for bus journeys.

This system allows users to conveniently plan their travels, choose specific routes, select preferred seats, and make secure online payments.

It offers a user-friendly interface that enables individuals to browse through available bus schedules, compare prices, and make informed decisions based on their preferences and requirements.

By leveraging technology, this system enhances efficiency and accessibility, ensuring a smoother and more organized bus ticket booking experience for both passengers and bus operators.

OBJECTIVES

USER CONVENIENCE

Book Bus Tickets online and avoid Long Queues at Ticket Counters.

EFFICIENT MANAGEMENT

The System ensures Efficient Management of Bus Schedules , including Seat Availability and Route Convenience.

CHEAPER TRANSPORT

The System aims to provide affordable travel for all types of passengers with its reasonable ticket prices

CASHLESS BOOKING

The System has a Secure Payment Gateway that uses various Payment options to make Online Bookings Cashless.

PROJECT CATEGORY

The bus ticket management system falls under the category of "Transportation and Ticketing Solutions."

This category encompasses various software and digital platforms that facilitate ticketing, reservations, and management processes for transportation services, including buses, trains, flights, and more.

These solutions aim to streamline ticket purchasing, seat selection, scheduling, payment processing, and passenger management for a seamless and efficient travel experience.

TOOLS/PLATFORM HARDWARE & SOFTWARE

HARDWARE

- Processor : Core2duo Or Above
- Ram : 2048MB or Above
- Cache Memory : 128kb or Above
- Word-Editors : Notepad++
- Scripting Language : JS , HTML , CSS, PHP
- Backend : SQL Server

PLATFORM

- Operating System: Windows 7 or
- Higher
- RAM: 2048MB or Higher
- Processor: Core2duo Or Higher
- Printer: Compatible
- Screen Resolution: 1024x768

Proposed System

Description :

Backend Development

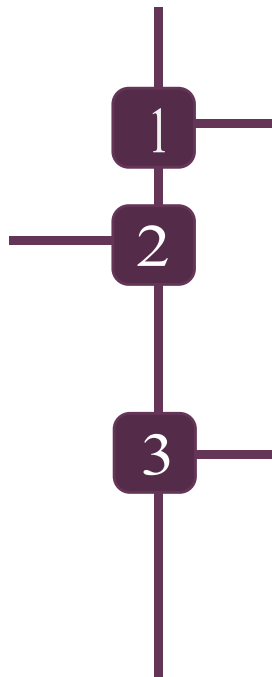

The proposed bus ticket booking system involves the development of a robust platform built on the back-end to ensure server-side

Frontend Development

The front-end development is focused on the user interface and design of the platform to ensure optimal user

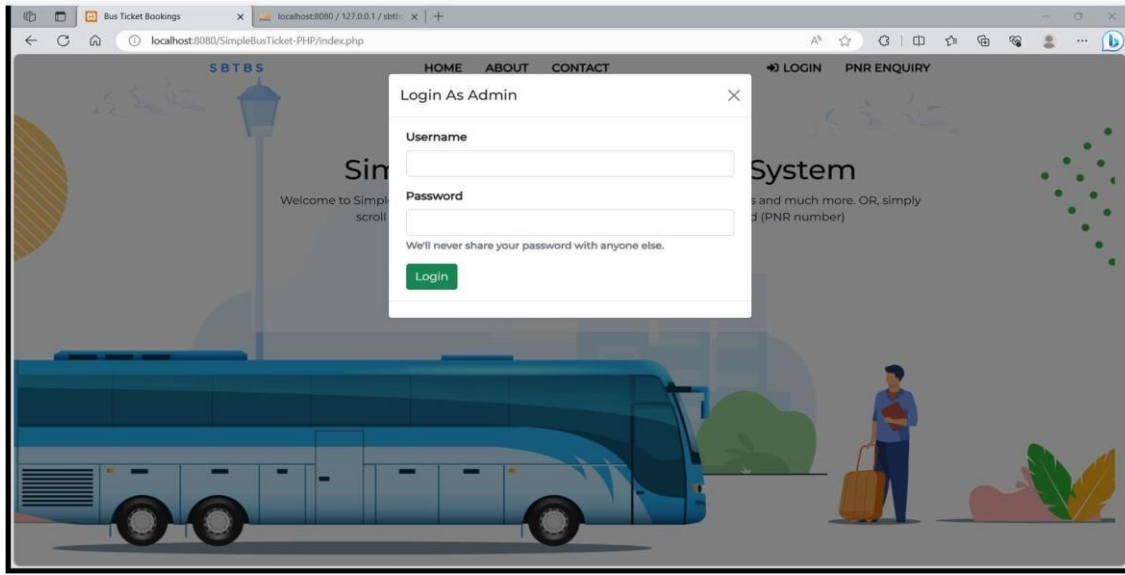

Testing & Launching

After thorough testing, the platform is launched and monitored for optimal
