Mfg. Paper Mill Machinery & Parts.

GSTIN- 24AKSPP4344A1Z8

Certificate of Completion

This is to certified that **Tirth Prajapati, Lakshya Parihar** and **Uday sathvara** they are a student of **silver oak University** has been successfully completed the project title '**SCE website**' In Shri Chamunda engineer with reference to the fully fullfilment degree of Bachelor in computer application. They had taken training in our company during the academic year January 2024 to May 2024. At shri chamunda engineers they are found sincerely and hard working

Thank you for your hard work and dedication during your internship,

We appreciate your skills & we wish you all the best in your future endeavours
Best of luck !

- **Project Details:**

- Name : SCE WEBSITE
- IDE: Vs Code
- Frontend : HTML, CSS, BOOTSTRAP, JAVASCRIPT, PHP
- Backend : PhpMyAdmin

For, Shree Chamunda Engineers

ACKNOWLEDGEMENT

We wish to express our heartfelt appreciation to all those who have contributed to this project, both explicitly and implicitly, without the co-operation of whom, it would not have been possible to complete this project.

First And for most, We Are Thankful to **Mrs Hemal Patel** Honourable **Principle**, and **Mr Amit Patel, HOD** of Silver Oak College of Computer Application, Silver Oak University, Ahmedabad. Our Efforts Got Oriented through Able Guidance from the Experts **Mrs Vandana Patel**. We Sincerely Acknowledge Our Deep and Hearty Gratitude Towards. I thank them for sharing their experience, knowledge and valuable time with me and showing their concern in my project to make it better.

We extend our warmth thanks to our project guide. **Prof. Vatsal Rakholiya**. For her guidance and constant encouragement throughout the semester for providing their valuable time, advice for various problems whenever we needed for deciding the objectives for our reports.

We also thank all the other faculties who directly or indirectly supported me in making my project successful by sharing their ideas and knowledge. At last, I would like to thank our parents and friends who have directly or indirectly helped us in making the project work successful.

Enrolment No and Name:

2104030100785 Prajapati Tirth

2104030100885 Uday Sathvara

ABSTRACT

This abstract presents a comprehensive overview of a product enquiry website designed to facilitate the seamless enquiry of papermill & machinery products from various manufacturers. The website aims to enhance user experience by providing a user-friendly interface where customers can browse products, request a call, and add products to enquiry list. The development of this website involved leveraging modern web technologies Such as: HTML, CSS, PHP, JavaScript and SQL Database to ensure responsiveness, reliability, and security.

Key features of the SCE Papermill & Machinery website include a robust product listing with an option to add them to enquiry list, a specific request page for requesting call from company for any specific product/s. Additionally, the website employs a user registration system to enable personalized user experiences. The design focuses on responsiveness, ensuring optimal performance across various devices such as desktops, tablets, and smartphones.

In conclusion, this abstract provides an insightful overview of a SCE Papermill & Machinery website that aims to revolutionize the online product enquiring experience by integrating advanced features, intuitive design, and robust functionality. The website serves as a valuable platform connecting users with their Manufacturers, offering convenience, efficiency, and satisfaction in the process of enquiring a product online.

CHAPTER 1

Introduction

1.1 Project Summary:

The purpose of this document is to provide a detailed overview of our Design product, its parameters and goals. This document describes the project's target audience and its user interface, hardware and Equipment requirements. It defines how our client, team and audience see the product and its functionality.

- Planning: Define objectives, scope, and requirements.
- Design: Create system architecture, UI, and functionalities.
- Development: Implement front-end (HTML/CSS, BOOTSTRAP) and back-end (MySQL, PHP).
- Testing: Conduct unit, integration, and user acceptance testing.
- Deployment: Roll out the system on servers or cloud platforms.
- Maintenance: Provide ongoing support and updates post-launch.

1.2 Project Purpose:

The purpose of a Product Enquiry System is to facilitate communication between potential customers and businesses, enabling:

- Information dissemination: Providing accurate and detailed information about products or services to interested customers.
- Customer engagement: Allowing customers to ask questions, seek clarification, and express interest in offerings.

- Lead generation: Capturing potential leads from inquiries and converting them into sales opportunities.
- Customer service improvement: Identifying common enquiries or issues to improve product documentation, marketing materials, or customer support.

1.3 Project Objectives:

The objectives of a Product Enquiry System can be summarized as follows:

- Prompt response: Ensuring timely and accurate responses to customer enquiries to maintain engagement and interest.
- Lead management: Capturing and nurturing leads generated through enquiries to convert them into sales.
- Knowledge management: Gathering insights from enquiries to improve product knowledge and marketing strategies.
- Customer relationship building: Establishing positive interactions with customers through helpful and informative responses.
- Performance tracking: Monitoring the effectiveness of the enquiry process to identify areas for improvement and optimization.

CHAPTER 2

System Analysis

2.1 Project Scope:

The scope of a Product Enquiry System covers the process of customers seeking information about products or services offered by a business. This system typically includes:

- Customer interfaces (website or phone) for submitting enquiries.
- Backend systems for receiving, processing, and responding to enquiries.
- Integration with customer relationship management (CRM) systems to track enquiries and interactions.
- Reporting and analytics capabilities to monitor enquiry trends and effectiveness.

2.2 Need for New System:

- With the contribution in the mode ecommerce we will be able to scaleup the margin by providing appropriate spare parts, giving a space to repair and maintain the machinery.
- Throughout each step our management will handle all the services for you to make this process more quicker and easier in digital way
- This System can also be used as enquiry business as if a customer want to enquire about a machinery or spare part.
- Existing systems often neglect the crucial functions of maintenance and repairing for essential machinery, so from preventing this to happen we will make a quick assurance of the (product/ machine) to work as fine as possible

2.3 Advantages of Product Enquiry Systems:

- **Improved Customer Service:** Customers can easily enquire about products or services, getting quick and accurate information from businesses.
- **Increased Sales Opportunities:** By promptly addressing customer enquiries and providing detailed information, businesses can convert enquiries into sales.
- **Market Research and Insights:** Gathering enquiries over time can provide valuable market insights.
- **Information Flow:** Product enquiry systems help streamline the flow of information within a business. Sales and customer service teams can access enquiry history and respond efficiently, avoiding duplication of efforts.
- **Competitive Advantage:** Offering a responsive and informative product enquiry system sets businesses apart from competitors. It demonstrates a commitment to customer service and responsiveness.
- **Customer Support:** Handling product enquiries digitally can be more cost-effective compared to traditional customer support channels like phone calls or in-person consultations.
- **Feedback Collection:** Product enquiry systems can also serve as a platform for collecting customer feedback and suggestions.

2.4 Disadvantages of Product Enquiry Systems:

- **Privacy and Security Concerns:** Collecting and managing customer data through enquiry systems may raise privacy and security issues. Businesses must ensure data protection compliance to safeguard customer information.
- **Risk of Miscommunication:** Without face-to-face interaction, there's a higher risk of miscommunication or misunderstanding between customers and businesses.
- **Resource Intensive:** Managing and responding to product enquiries requires dedicated resources (e.g., staff, time, technology). This can add operational costs for businesses.
- **Lack of Personal Touch:** Automated or standardized responses in product enquiry systems may lack the personal touch of human interaction, potentially affecting customer experience.
- **Potential for Information Overload:** An influx of inquiries can overwhelm businesses, making it challenging to respond promptly and effectively to all queries.
- **Complexity of Integration:** Integrating product enquiry systems with existing business processes and databases can be complex and require ongoing maintenance and updates.

CHAPTER 3

Functional Specification

3.1 USER OF THE SYSTEM:

Admin:

- The admin can login into system by entering some credentials.
- The admin can add, remove and manage all the users.
- The admin can add, remove and manage all the products.
- The admin can send notifications and announcements to their team members & users.
- The admin can manage the maintenance and repair requests.
- The Marketing team can manage enquiries and send Quotation directly to the party.

Customer:

- The customer has to register on website by giving some information and can login to the website by providing their credentials.
- The customer will be able to browse and scroll through the pages for the products they want with specific item description.
- The customer will be able to add the products as per requirement and proceed for further formalities.
- The customer can contact for maintenance or repairing of machineries by providing proper details.

3.2 MODULE OF THE SYSTEM:

➤ Registration:

- The Customer and Admin team can register on the website by providing all the details such as email and password..
- Without being registered user or admin can not access the system.

➤ Login:

- The Customer and admin can login on the website by providing valid credentials.
- If the customer enters wrong or invalid credentials then he or she cannot login to the system.

➤ Manage User:

- Admin can manage all users, manage their information, can delete their information etc.
- Customer can manage their information, edit their information through user-profile.

➤ Manage Product:

- The admin can manage all products, can edit the product details, can delete products, can add products.

- The customer can manage the products in the enquiry cart and can put a request a call for a particular product.

➤ **Manage Requests:**

- The admin can manage all the requests regarding to repair and maintenance of machineries.
- The customer can add a request for a product by entering all the details in the request page.

➤ **Reviews:**

- The Customers can add reviews for the products they have selected or requested.
- The admin can manage and see all the reviews inserted by the customers.

CHAPTER 4

System Requirements

4.1 MINIMUM SOFTWARE REQUIREMENT:

Server Side Requirement	
Operating System	Window 7 ultimate/Linux or Any Compatible Server OS
Web Server	APACHE
Front-End Tools	HTML , CSS , JAVASCRIPT , BOOTSTRAP
Back-End Tool	MySQL 5.8 , PHP 6.2
Client Side Requirement	
Operating System	Window 7 ultimate/Linux or Any Compatible OS
Web Browser	Google Chrome or Any Compatible Browser

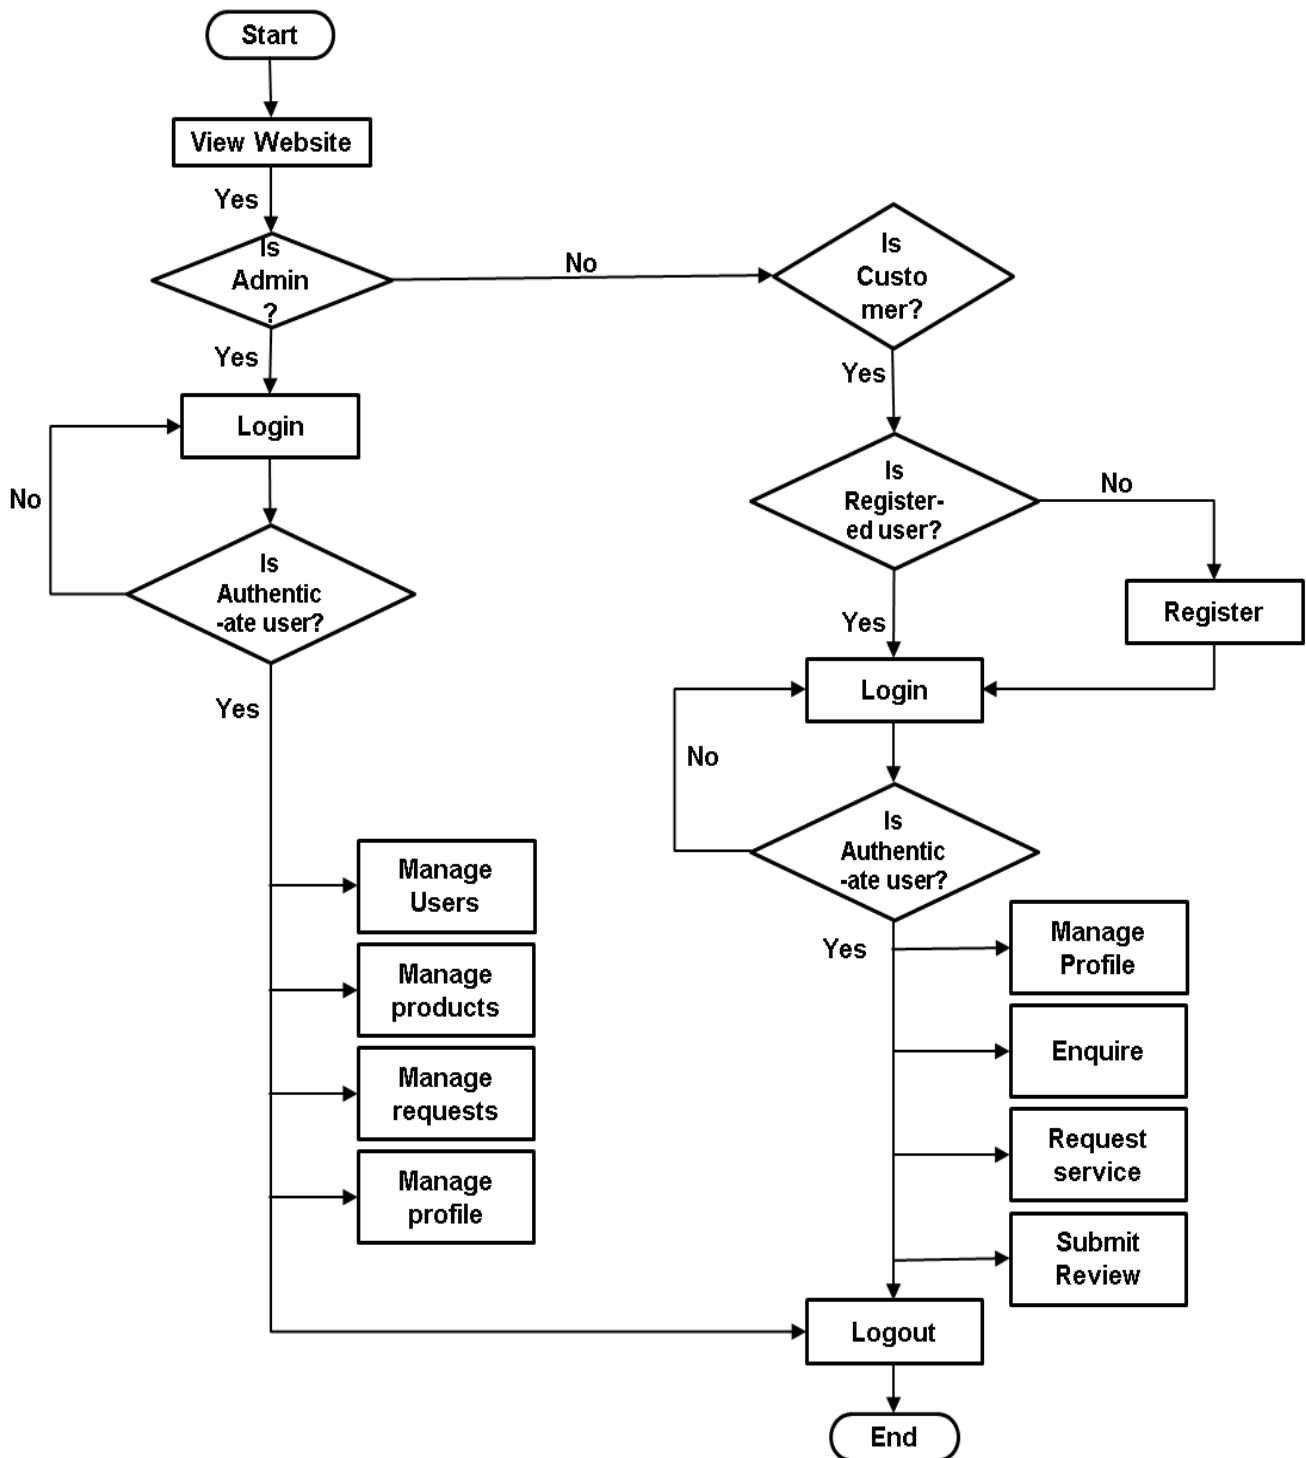

4.2 MINIMUM HARDWARE REQUIREMENT:

Server Side Requirement	
Processor	Intel or AMD 3.1GHz
RAM	4/12 GB
Hard disk	8 GB(Free Space)
Client Side Requirement	
Processor	Intel or AMD 2.66GHz
RAM	4/12 GB
Hard disk	8 GB(Free Space)

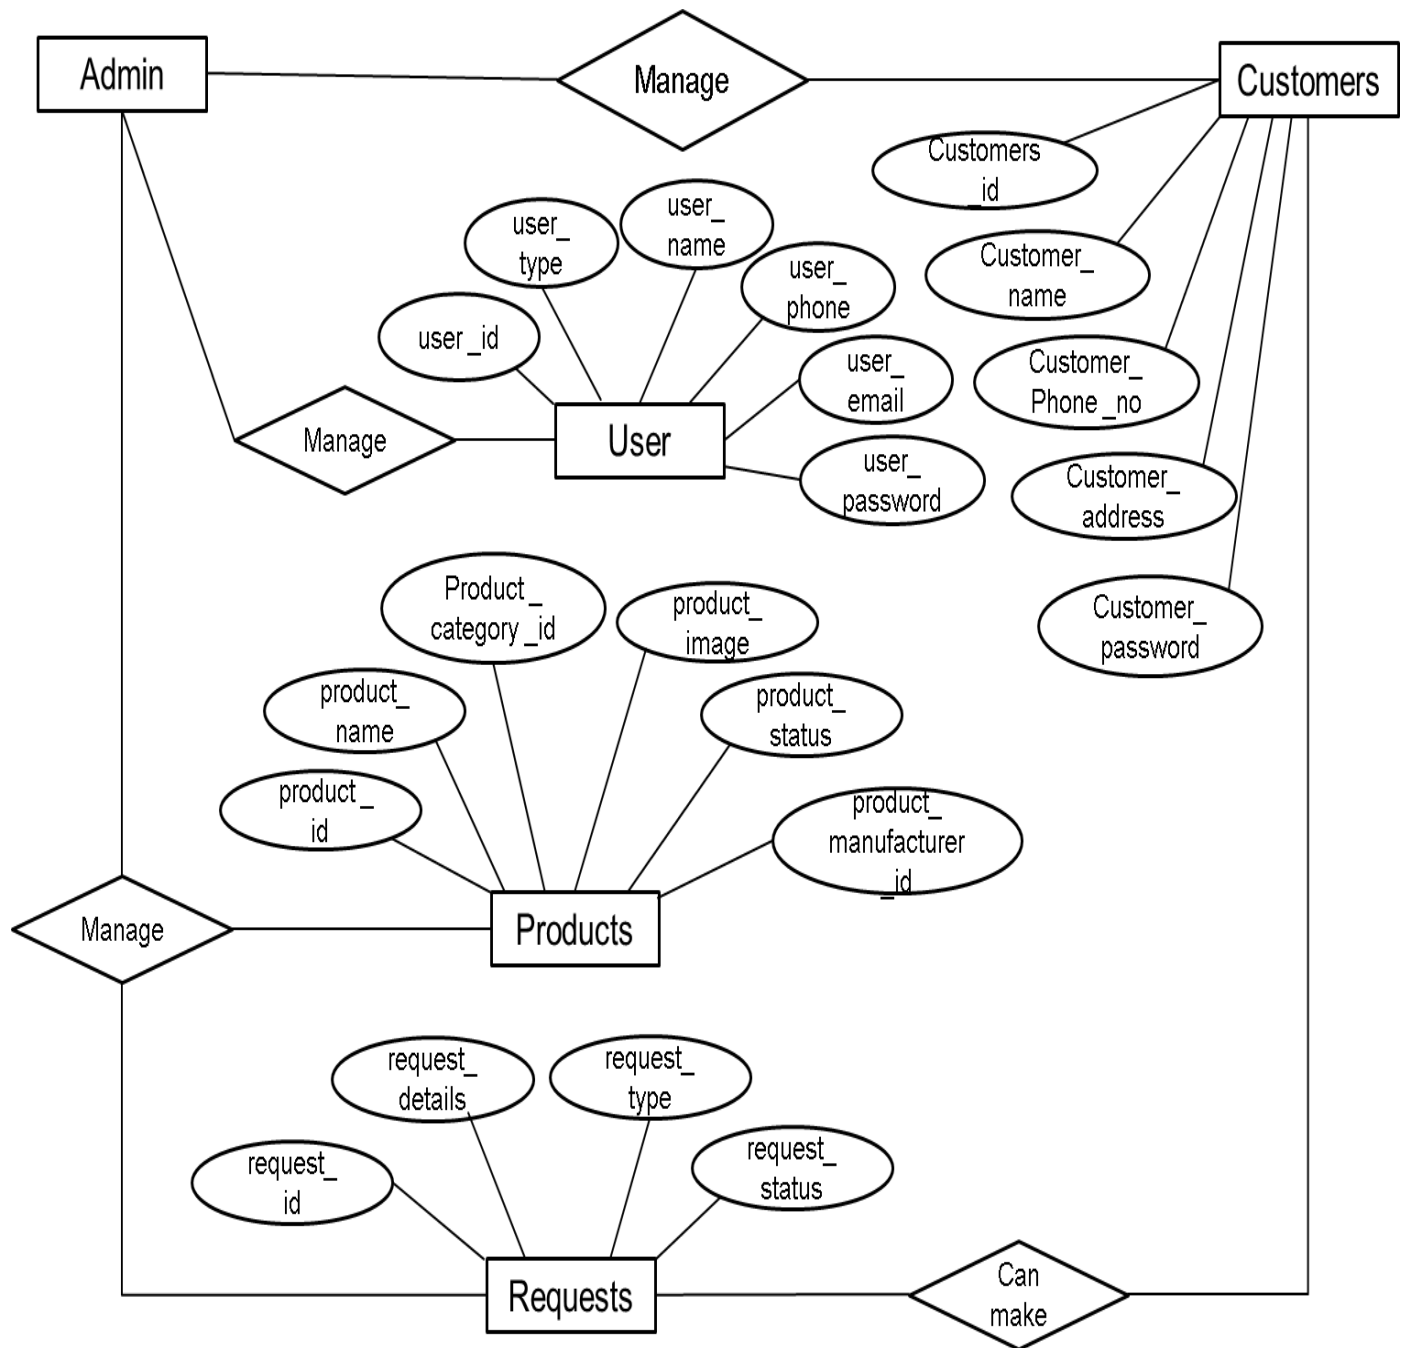

CHAPTER 5

Description: - This is login page. Admin can login by providing information.

LOGIN PAGE WITH VALIDATION

Description: - It is login page with validation. If any field is empty then login page will give one error message as popup.

ADD PRODUCTS

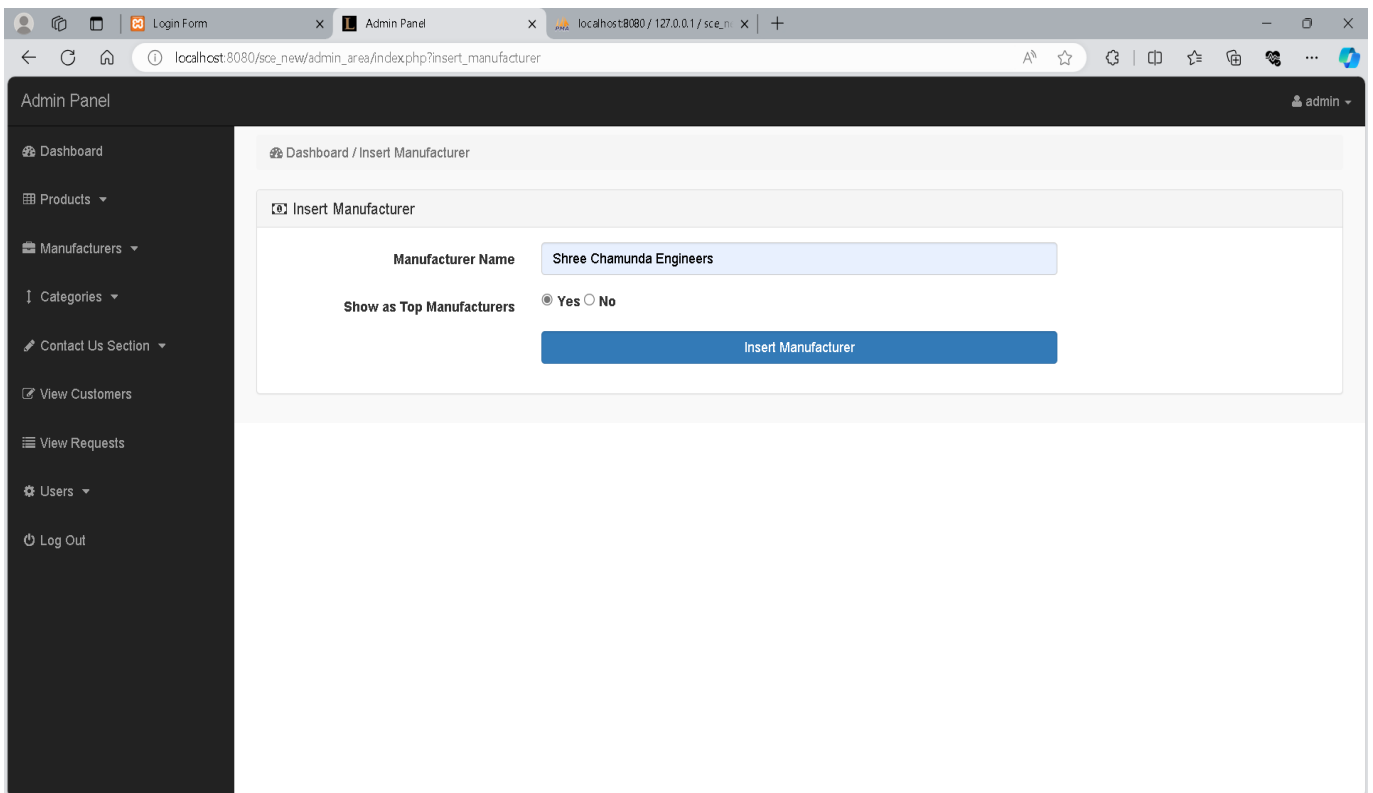

The screenshot displays a web browser window with the URL `localhost:8080/sce_new/admin_area/index.php?insert_product`. The page is titled "Admin Panel" and shows a sidebar with navigation options: Dashboard, Products, Manufacturers, Categories, Contact Us Section, View Customers, View Requests, Users, and Log Out. The main content area is titled "Dashboard / Insert Products" and contains a form titled "Insert Products". The form has the following fields:

- Product Name:** A text input field containing "Felt Roll".
- Select A Manufacturer:** A dropdown menu with "Shree Chamunda Engineers" selected.
- Category:** A dropdown menu with "Machinery" selected.
- Product Image:** A file upload field with a "Choose File" button and the filename "img4.png" displayed.

At the bottom of the form is a blue button labeled "Insert Product".

Description: - It is add product page. Admin can add product by clicking "Insert product" button by providing product information.

INSERT MANUFACTURERS

The screenshot displays a web browser window with the URL `localhost:8080/sce_new/admin_area/index.php?insert_manufacturer`. The page is titled 'Admin Panel' and features a dark sidebar with navigation links: Dashboard, Products, Manufacturers, Categories, Contact Us Section, View Customers, View Requests, Users, and Log Out. The main content area is titled 'Dashboard / Insert Manufacturer' and contains a form titled 'Insert Manufacturer'. The form has two fields: 'Manufacturer Name' with the value 'Shree Chamunda Engineers' and 'Show as Top Manufacturers' with radio buttons for 'Yes' (selected) and 'No'. A blue 'Insert Manufacturer' button is located at the bottom of the form.

Description: - It is insert manufacturer page. Admin can add manufacturer by clicking “Insert manufacturer” button by providing manufacturer information.

INSERT CATEGORIES

The screenshot displays a web browser window with the URL `localhost:8080/sce_new/admin_area/index.php?insert_cat`. The page is titled 'Admin Panel' and shows a sidebar with navigation options: Dashboard, Products, Manufacturers, Categories, Contact Us Section, View Customers, View Requests, Users, and Log Out. The main content area is titled 'Dashboard / Insert Category' and contains a form for adding a new category. The form has a 'Category Name' field with the value 'Spare Part', a 'Show as Category Top' section with radio buttons for 'Yes' (selected) and 'No', and a blue 'Insert Category' button.

Description: - It is insert categories page. Admin can add product categories by clicking “Insert categories” button by providing category information.

ADD USER

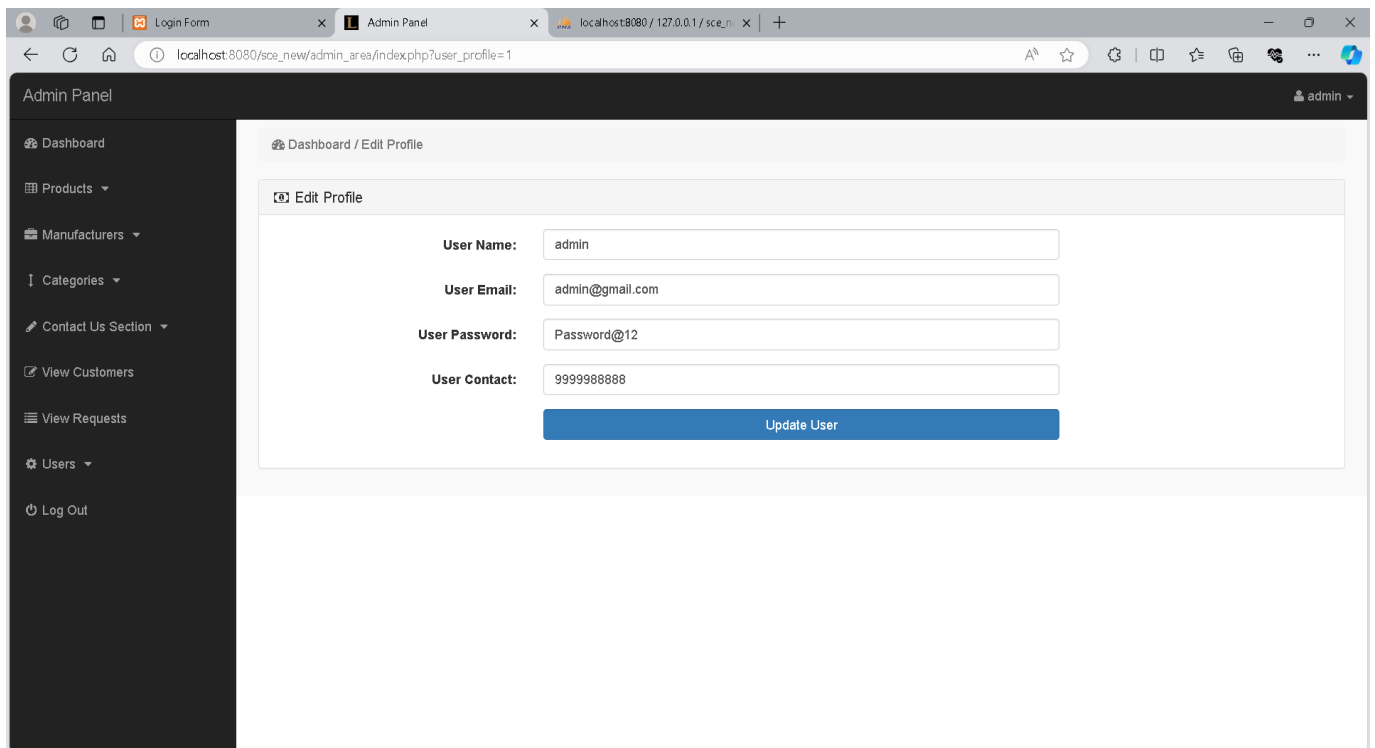

The screenshot shows a web browser window with the URL `localhost:8080/sce_new/admin_area/index.php?insert_user`. The page is titled "Admin Panel" and has a dark sidebar on the left with the following menu items: Dashboard, Products, Manufacturers, Categories, Contact Us Section, View Customers, View Requests, Users, and Log Out. The main content area is titled "Dashboard / Insert User" and contains a form titled "Insert User". The form has four input fields: "User Name" with the value "TestAdmin", "User Email" with the value "TestAdmin@gmail.com", "User Password" with the value "*****", and "User Contact" with the value "123456789". Below the input fields is a blue button labeled "Insert User".

User Name:	TestAdmin
User Email:	TestAdmin@gmail.com
User Password:	*****
User Contact:	123456789

Insert User

Description: - It is Add User page. Admin can add User by clicking “Add User” button by providing New User information.

EDIT PROFILE

The screenshot shows a web browser window with the URL `localhost:8080/sce_new/admin_area/index.php?user_profile=1`. The page is titled "Admin Panel" and features a dark sidebar with navigation links: Dashboard, Products, Manufacturers, Categories, Contact Us Section, View Customers, View Requests, Users, and Log Out. The main content area is titled "Dashboard / Edit Profile" and contains a form titled "Edit Profile". The form has four input fields: "User Name" (admin), "User Email" (admin@gmail.com), "User Password" (Password@12), and "User Contact" (9999988888). A blue "Update User" button is located at the bottom of the form.

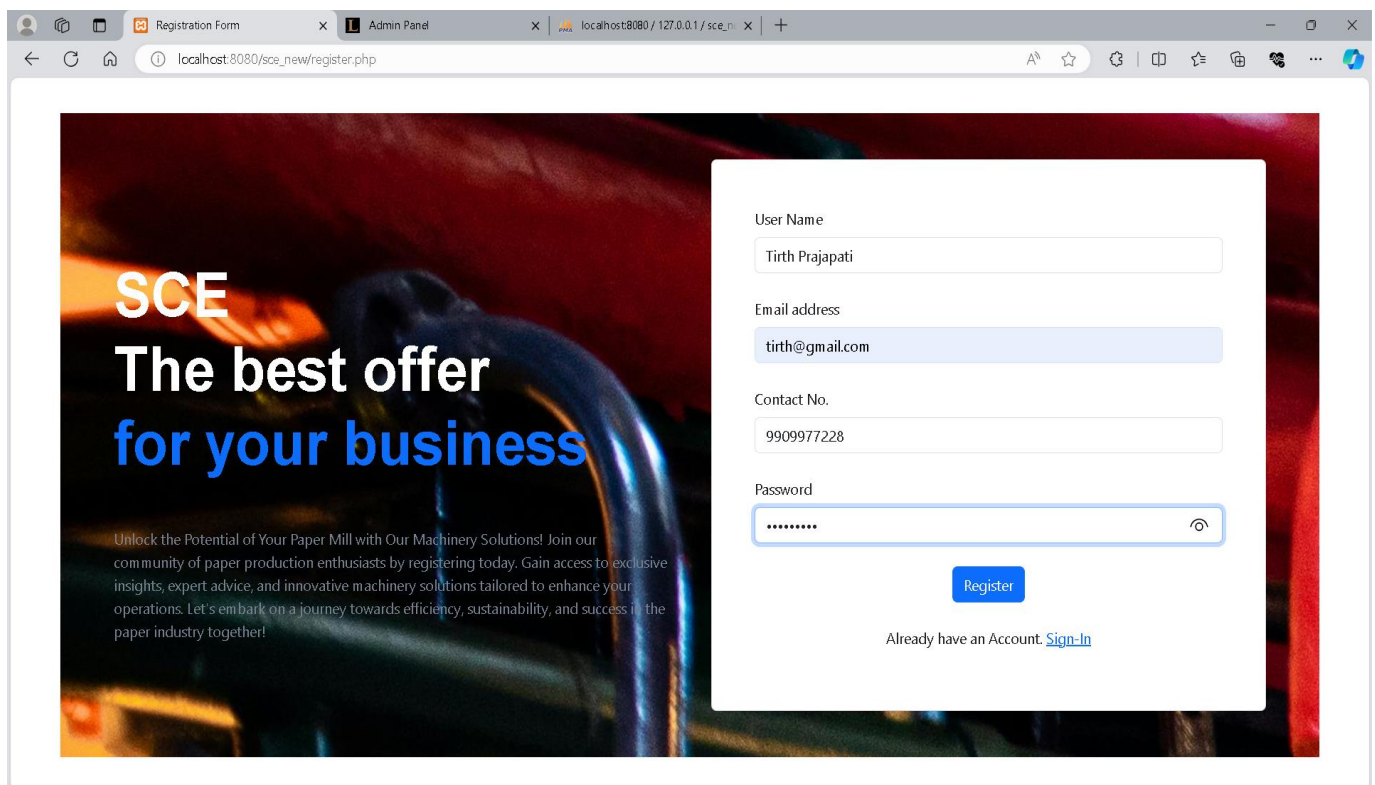

User Name:	admin
User Email:	admin@gmail.com
User Password:	Password@12
User Contact:	9999988888

[Update User](#)

Description: - It is Edit Profile page. Admin can Edit Profile by clicking “Edit Profile” button by providing editable information.

6.1.2 INPUT DESIGN FOR USER SIDE

REGISTRATION PAGE

The screenshot displays a web browser window with the URL `localhost:8080/sce_new/register.php`. The page features a registration form for 'SCE'. The background image shows industrial machinery with the text 'SCE The best offer for your business'. The form fields are as follows:

Field	Value
User Name	Tirth Prajapati
Email address	tirth@gmail.com
Contact No.	9909977228
Password	*****

Below the form is a blue 'Register' button. At the bottom, there is a link: 'Already have an Account: [Sign-In](#)'.

CHAPTER 8

FUTURE ENHANCEMENT

- We will make the website more functional by adding new features such as delivery status, google maps, etc.
- We will provide google authentication facility, so user can sign up through google account.
- We will provide the SMS and Email facility.
- We will improve & enhance customer experience.
- We will add an AI/chatbot to assist with user's and to make the process easier for users.
- We will provide personalization in products for users.

CHAPTER 9

CONCLUSION

In conclusion, the implementation of a product enquiry system offers significant advantages to businesses seeking to streamline customer inquiries and enhance overall customer experience. By utilizing a centralized platform for managing product-related queries, organizations can efficiently handle customer requests, provide timely responses, and gather valuable insights into customer preferences and concerns. The product enquiry system facilitates improved communication between customers and businesses, leading to higher levels of customer satisfaction and loyalty. It enables businesses to promptly address customer inquiries, resolve issues, and provide accurate information about their products or services.
